

EASYIMAGES – FULLY UPDATED WINDOWS IMAGE

Fully updated hardware neutral Windows Images.

Why would you spend valuable time to download and install the many updates every time you need to deploy a new computer. With a few clicks you can download a new image from IXP Data.

It is assumed that you, as a customer, has a valid Windows license agreement with Microsoft.

Supported images

Microsoft Windows 7 and upwards.

All images are built in a virtual environment to achieve 100% hardware independence.

No license keys are used when processing images.

All images are built in workgroup so that the image will not be affected by domain group policies.

All images are updated with all Microsoft critical and recommended updates.

All images are provisioned with Microsoft SysPrep.

All images are built in Microsoft WIM format.

All images will work with legacy MBR and UEFI boot.

It is possible to buy a single image, but an economic advantage is obtained if you make a subscription and get 4 new images per year. (medio March, medio June, medio September and medio December).

All images are tested and scanned for computer virus.

EasyImages subscription is made per Image.

The subscription runs for a year.

You will receive an e-mail when a new image is ready for download.
