

Efficiently Manage All Your Business Devices with EasyInstall

Overview

EasyInstall is a comprehensive Unified Endpoint Management (UEM) solution supporting Microsoft Windows, Google Android, Apple iOS, and MacOS clients. With EasyInstall, managing your devices has never been easier.

How to use EasyInstall MDM

Using EasyInstall MDM is as straightforward as managing Windows computers. Android and Apple devices appear just like Windows machines in the EasyInstall admin console. Simply create packages from predefined templates for Android/Apple devices, and assign them in the same manner as for Windows machines.

EasyInstall Android MDM Supports:

- Android 6.0 and higher

Existing Android Devices

Existing devices can be connected via an MDM profile installed through an internal web link. EasyInstall can send an email with the installation profile link, allowing users to connect their devices themselves.

Enrollment / QR Code

During enrollment, apps can be automatically installed, and mail accounts, WiFi, and VPN profiles can be created. Devices can also be linked using a QR code. All data is encrypted and signed over a secure SSL/HTTPS connection, ensuring it can only be decrypted by the intended device.

Full Control

Maintain full control over all Android devices, whether they are within or outside the company. If a user removes the EasyInstall MDM profile from a device not linked via DEP, all company-installed content will be automatically removed.

Supportet Android Functions

- Samsung KNOX 4 and higher
- Google Play app management
- Installation of Enterprise APK apps
- Secure communication and encrypted content
- Device Lock and Erase
- Passcode management
- Location
- Notifications and alarms
- Over-the-Air (OTA) enrollment
- Google approved Android EMM Management
- Device/Work Profile
- Zero Touch
- White label, rebranding

Microsoft Exchange and Office 365 Integration

Full PowerShell integration with Microsoft Exchange Server and Office 365 enables control over device access to mailboxes.

Microsoft Protected Apps

Microsoft protected Android apps are fully compatible with EasyInstall. Apps built with Microsoft Intune App SDK can be managed, installed, and updated using EasyInstall.

Getting Started

For assistance with EasyInstall MDM, our skilled partners and consultants are ready to help. Contact us at info@ixpdata.com to learn more.

Pricing

No additional costs for EasyInstall MDM. It is freely available to all existing EasyInstall customers with valid software maintenance.

Licensing

An EasyInstall perpetual license per device is required, regardless of the device type. Licenses can be reallocated as needed.

EasyInstall MDM is integrated into our latest version.
