

EASYINSTALL

Complete Unified Endpoint Management solution

Complete device Management

If you manage all the Company's devices EasyInstall is the complete solution whether the platform is Windows, Android, Knox, Chromebook, iOS, iPad OS or macOS.

With EasyInstall you get a user-friendly and efficient solution for central administration of the Company's IT workplaces in single management interface for all connected endpoints.

Time saving

EasyInstall reduces wasted time and manual processes, as installation of operating systems, applications and updates takes place automatically over the network to the computers with the use of quite a few mouse clicks. The result is a fully configured IT workplace ready for use.

New updates and software can be rolled out immediately or when it's most convenient, giving users the freedom to work when it suits them without compromising the efficiency of the IT department.

High Security

The Company's endpoints is often an entry point for security breaches. With an effective endpoint management solution, you can manage the security of the users' endpoints.

The best Unified Endpoint Management

EasyInstall is a full Endpoint Management tool that makes deployment, much easier and more secure. EasyInstall can be used for both Android, Apple and Windows Devices.

Shares
Network drives
Printers
BIOS Settings
Antivirus
Active Directory user and computer objects
User activity
Power consumption
Software Deployment

Software Deployment

Supports all known package technologies
Scheduled package distribution
Recurring package distribution
Package creator with over 100 built-in templates
Create standard packages from Microsoft Winget catalog (over 9.000 apps)
Support for online installers, Winget, Ninite and Chocolatey
Software metering
Software detection rules
Package Install Priority
Package Dependencies
Package Requirements
Package Secure and encrypted variables
User interactive App Close, before package action
Mandatory package distribution based on group membership
Automatically package distribution based on EasyInstall group membership
Automatically package distribution based on AD group membership to users and computers
Built-in packages for e.g. OS updates, Device driver updates aso.
Built-in Package Analyzer
Package import and export
OS Deployment

Features

Windows Workstation and Servers (over

100 built-in templates)

PXE boot / WinPE

PXE over Internet

PXE proxy

USB boot

Zero-Touch Provisioning (White Glove)

Virtual keyboard

OS Deployment profiles

Image baseret or full unattended mode

Central initiated reinstallation

Device driver collect

Remote 'bare metal' OS reinstall on existing computers

Built-in support for Windows 10/11 in-place upgrade

Integration

Integration

Apple (ADE, VPP, Business- and School Manager)

Google (Zero-Touch, Android Enterprise)

Microsoft Active Directory

Microsoft Azure

Microsoft Intune

Microsoft Autopilot

Microsoft Remote Desktop

VNC, TeamViewer, AnyDesk, Damware aso.

Intel vPro AMT

Deep Freeze

Alarm and Warnings

Low disk space

Disk S.M.A.R.T. status

Broken secure channel for domain trust

Failed package actions

Manual Device Unenrollment

UAC disabled

Certificate expiring / expired

Duplicated device

Pending reboot
